

## Pure Yield

Potency

Every OvatioN herb is far more potent than typical herbal products on the market. triON contains 100% extracts with no fillers. We use herbs extracted at their natural extraction ratios or “Pure Yield”.

On average, our intensive process results in at least 10:1 yields, meaning it requires 10 pounds of raw herb to produce 1 pound of pure extract powder for triON. But, we go a step further and identify the unique herbal substances that require higher concentrations. Some of the herbs are 15:1, some 12:1, and we even have one that is 45:1—that is 45 pounds of raw herb to make 1 pound of just one triON ingredient!

Most manufacturers start with Pure Yield and cut them to concentrations of 4:1 or 5:1 by adding fillers. This produces a cheaper, less effective extract. Imagine buying a 5:1 extract that originally was 45:1. You would have to take 9 times as much herb to equal its Pure Yield potency and would be getting mostly filler with little to no results. We use only uncut, Pure Yield extracts. It's good to know that with triON, you're getting the full potency of the herbs you pay for!

## True Stories

“triON has helped with energy, stamina, digestive issues, mental clarity and stress-related eating. I have also lost 27 lbs that I had gained taking prescription medications for sugar imbalance. triON is truly a heartfelt blessing in the disguise of an energy drink.”

*Jan Longshore*

“The first time I took triON, I was amazed at the increase in my energy level during the day. I'm diabetic and my energy level was always very low. Now every day my energy is great, and I have improved stamina, improved sleep, and reduction in the inflammation and pain from bad knees. My health overall is really improving!”

*Richard LaCoste.*

## Concentrated

Herbal Extracts

The best way to deliver herbs to the body is by extracts, and OvatioN's ingredients are the best to be found. This isn't a marketing concept; its herbal tradition based on thousands of years of results.

Over 3,000 years ago, the Chinese discovered that the slow cooking of herbal formulas extracted the active essences of the herb and left behind the indigestible plant fibers. Today, a modernized cooking method is used to create state-of-the-art concentrated herb extracts.

The herbs are sifted and washed with purified water, cooked in large stainless steel vats and heated to temperatures below the boiling point. Hours later, this solution is further distilled in smaller sealed containers until the herbal essences are extracted to Pure Yield potency.

Volatile oils are captured and infused back into the finished extract. The concentrated paste is then spray-dried to create a pure extract powder. This guarantees maximum bioavailability and assimilation by the body.

This process is much more expensive and intensive than just using ground up raw herbs, a common practice with many herb companies. Raw herbs are much less expensive, less potent, difficult to digest, and in some cases totally worthless. That's why we use Superior Class herbs with a superior technology.

triON

## The Herbs in triON

OvatioN utilizes premium quality herbs that are bioactive and chemical free. Our

Superior Class herbs (the highest class of Chinese herbs) are considered wild-crafted and ethically harvested. Grown in the mountain regions of China according to ancient tradition, they are considered semi-wild. Because they are grown in the wild, the herbs are basically organically grown.

OvatioN is aware of the environmental factors that affect our food and supplement supply. That is why we have taken great care in selecting suppliers for the formulation of triON. We simply could not settle for anything less than quality, purity, and safety. It is our commitment to you.

The Chinese herbs our suppliers use have been tested by botanists using microscopic physical examination and TLC analysis. This analysis tests unique marker compounds and screens for heavy metals and pesticides. Only the unadulterated harvests are used. This strict quality control ensures that our herbs are closely inspected and held to the same high standards even during the growing and harvesting phase.

Our customers can be assured that when they use triON, they are taking a product that has been held to the most rigorous of standards. We guarantee the highest quality throughout the entire process from farm to extraction, assuring all the special nuances that make triON unique and impossible to duplicate.

# HIGH QUALITY

## BEGINS WITH QUALITY INGREDIENTS

**Goji** has long had the reputation of enhancing longevity. It is an important part of the Chinese philosophy of health. This herb works to support the immune system, eyesight, circulation, liver function and sexual vitality. It helps to support the retina and fight age related diseases in the eye. Goji has also been used to support normal blood pressure, kidney function, fertility and normal cholesterol levels.

**Schizandra** contains more than 20 "lignans", making it very beneficial in the support of the liver. It helps the body to fight disease and adapt to stresses from physical, mental, chemical, and environmental sources. It is also valuable in increasing the body's metabolism. In Chinese Herbology, this herb tonifies, acts as an astringent, nourishes, detoxifies, strengthens and helps reduce stress.

**Eucommia** may help treat back ailments, fortify sinews and bones and support healthy knee function. This small herb tree is nearly extinct in the wild and must be specially cultivated for its bark.

**Rhodiola Rosea** may be effective for improving mood and helping to alleviate depression. Russian research shows that it improves both physical and mental performance and reduces fatigue. It is used to balance the hypothalamus, pituitary and adrenal axis.

**Cocoa** comes from the cacao tree and was once considered "The Food of the Gods." Cocoa, a great energy food, contains flavonoids which support a healthy cardiovascular system. It also appears to support natural circulation and healthy blood pressure and contains important natural antioxidants.

**Anemarrhena** grows in the northern parts of China. In Chinese Herbology this plant supports healthy lung function and the immune system. It may be useful in helping alleviate the symptoms of urinary tract infections, irritability, night sweats and hot flashes.

**Green Tea** originated in China and was later adopted by the Japanese. It is considered to be a true tea and is prized for its ECGC, natural plant antioxidant polyphenols that support a healthy immune system and healthy digestion. The herb contains vitamins C and E, and has been known to assist in lowering LDL cholesterol levels and inhibiting the abnormal formation of blood clots.

**Gynostemma** is the Chinese "Miracle Grass." This nickname was given due to its many health giving qualities and anti-aging effects. It is prized as an adaptogen and strong antioxidant and supports the body in response to stress.

**Club Moss** supports healthy brain functions related to memory and aging. It is also known to support healthy muscle function and the urinary tract.

**Momordica** contains a protein which may support a healthy immune system, support the lungs and cleanse the blood. It contains charantins which are insulin-like peptides that may help control insulin levels in diabetics.

**Fo-ti** is considered a rejuvenating herb. In Chinese Herbology, it is a longevity tonic that is used for premature aging, weakness, vaginal discharge and erectile dysfunction. It is also used to support healthy kidney function, balance yin and support the immune system.

**Yerba Mate** has been used for centuries as a tonic tea. It contains xanthenes like those contained in cocoa and acts as a stimulant to the nervous system without the negative effects of beverages like coffee. Chinese Herbology considers it calming.

**Eleuthero** also known as "Siberian Ginseng". It is an adaptogenic herb used to support a healthy balance between the hypothalamus, pituitary and adrenal glands which helps to ensure a positive recovery from stress. It also helps to normalize the body's functions, build stamina, increase sex drive, reduce pains from aging and enhance immunity.

**Reishi** means "Herb of Spiritual Potency" in Chinese and is also known as the "Mushroom of Immortality". It is considered one of the most widely known herbal mushrooms. A famous Chinese herbal book written in 2838 B.C., records Reishi as the most valuable of all "Superior Class" herbs. An adaptogen, that supports a healthy immune system and blood pressure levels, it contains a substance called ganoderic acid, known to support healthy liver function.

**Astragalus is used in** Chinese Herbology as a remedy for the symptoms of weakness, edema, night sweats, diarrhea, heart disease, and high blood pressure. Certain journals suggest the herb may stimulate the immune system and the body's ability to resist and combat various diseases.

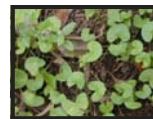

**Licorice** is an important part of the Chinese and Ayurvedic philosophy of wellness. It is used as an expectorant and adaptogen. It also supports a healthy immune system, and helps protect from environmental toxins.

**Stevia** is commonly known as "sweetleaf". It is used to support a healthy pancreas. The pancreas is responsible for insulin regulation and malfunction of this organ can lead to diabetes. Stevia also supports a healthy immune system by having strong anti-fungal, anti-bacterial properties.

**Polygala** not only aids creative thinking, but the ability to manifest our ideas. In fact, the ancient name for this herb is the "Will Strengthener." According to Chinese Herbology, it also supports the kidneys, healthy sleep patterns, vision, mental clarity, and mental outlook.

**Gotu Kola** is important in both the Chinese and Ayurvedic philosophy of wellness. It contains protein substances which support a healthy release of nitric oxide. This relaxes the circulatory system and supports the nourishment of brain cells.
